

**Listing of Claims**

The following listing of claims will replace all prior versions, and listings, of claims in the subject application:

Claims 1-22 (canceled).

23. (currently amended) A method for promoting product sales in Internet transactions, the method comprising:

providing a user interface at a customer side for a customer to place a purchase order through the Internet to a seller side, the user interface including an ordering screen for the customer side to select at least one product and enter an initial product order including information specifying a quantity of the selected product being ordered;

comparing the specified quantity of the initial product order, placed by the customer to the seller side, to a minimum quantity;

changing display information to be delivered to the customer side in accordance with the specified quantity of the specified product, wherein

if the specified quantity of the initial product order is equal to or greater than the minimum quantity, ~~delivering to the customer side~~ display information for a promotion screen containing information regarding a selected promotion which is functionally related to the initial product order and is contingent on a revision of the order by the customer to make an additional purchase is delivered to the customer side, [[:]] and

if the specified quantity of the initial product order is less than the

minimum quantity, ~~processing~~ the initial product order received from the customer side is processed and ~~delivering~~ no promotion information is delivered to the customer side.

24. (currently amended) A method for enhancing product sales in Internet transactions, the method comprising:

delivering display information to a customer side for ordering products via the Internet;  
receiving at a seller side an initial order entered at the customer side for a specified product and a specified quantity thereof;  
comparing the specified quantity of the initial order, placed by the customer side to the seller side, to a minimum quantity;  
changing the display information to be delivered to the customer side in accordance with the specified quantity of the specified product, wherein

if the specified quantity of the specified product is within a first range that is higher than a minimum quantity, ~~delivering to the customer side~~ display information indicative of at least a first promotion which is functionally related to the initial order and is contingent on a revision of the order to make an additional purchase is delivered to the customer side, [[:]]  
and

if the specified quantity of the specified product is less than the minimum quantity, ~~delivering~~ order processing information is delivered to the customer side for the initial order and ~~delivering~~ no promotion information is delivered to the customer side.

25. (currently amended) ~~[[The]]~~ A method of claim 24 for enhancing product sales in Internet transactions, [[wherein]] the method comprising:
- delivering display information to a customer side for ordering products via the Internet;
- receiving at a seller side an initial order entered at the customer side for a specified product and a specified quantity thereof;
- comparing the specified quantity of the initial order, placed by the customer side to the seller side, to a minimum quantity;
- changing the display information to be delivered to the customer side in accordance with the specified quantity of the specified product, wherein
- if the specified quantity of the specified product is within a first range that is higher than a minimum quantity, display information indicative of at least a first promotion which is functionally related to the initial order and is contingent on a revision of the order to make an additional purchase is delivered to the customer side;
- if the specified quantity of the specified product is in a second range higher than the first range, ~~delivering to the customer side~~ display information indicative of at least a second promotion that is different from the first promotion is delivered to the customer side, and
- if the specified quantity of the specified product is less than the minimum quantity, order processing information is delivered to the customer side for the initial order and no promotion information is delivered to the customer side.

26. (previously presented) The method of claim 25, wherein the first promotion is for a

retail sales transaction and the second promotion is for a business-to-business transaction.

27. (previously presented) The method of claim 24, wherein the display information indicative of a first promotion includes information regarding a difference between the initial order quantity and a quantity for qualifying for the first promotion.

28. (previously presented) The method of claim 24, wherein the first promotion includes providing without charge one or more products different from the specified product.

29. (previously presented) The method of claim 24, wherein the customer side and seller side are at geographically remote locations.

30. (currently amended) A method for promoting product sales over a network, the method comprising:

displaying a first screen for ordering products at a customer side and receiving at a supplier side via the network an initial product order entered at the customer side in response to the displayed first screen;

comparing the initial product order, placed by the customer side to the seller side, to a minimum quantity;

changing display information to be delivered to the customer side in accordance with the specified quantity of the specified product, wherein

if the initial product order is equal to or greater than the minimum quantity, ~~displaying at the customer side~~ a second screen that selectively

includes information regarding at least one promotion functionally related to the initial product order, and that offers the customer choices including confirming the initial product order and changing to a revised product order related to the at least one promotion, is displayed at the customer side, [[:]] and

if the initial product order is less than the minimum quantity, ~~displaying at the customer side~~ a third screen containing information regarding status of the sales transaction is displayed at the customer side and ~~not displaying any~~ no promotion information is displayed at the customer side at the customer side.

31. (previously presented) The method of claim 30, wherein the second screen includes the information regarding the at least one promotion only when the initial product order is within a selected range of quantities.

32. (previously presented) The method of claim 30, wherein the second screen includes information regarding a difference between the initial product order and an order that would qualify for the at least one promotion.

33. (previously presented) The method of claim 30, wherein the second screen includes information regarding a first selected promotion when the initial product order is within a selected first range but a second selected promotion when the initial product order is in a second range higher than the first range.

34. (previously presented) The method of claim 33, wherein the second screen includes information for a business-to-business sales transaction when the initial product order is in the second range.

35. (previously presented) The method of claim 33, further comprising displaying at the customer side order processing information for a retail sale when the initial product order or the revised product order is in a first range but for a business-to-business sale when the initial product order or the revised product order is in a second, higher range.

36. (currently amended) A method for promoting product sales over a network, the method comprising:

providing an ordering screen user interface at a customer side containing information regarding at least one product and allowing the customer side to enter an initial product order including information specifying a product and quantity being ordered;

comparing the specified quantity of the initial product order, placed by the customer side to a seller side via the network, to a minimum quantity;

changing display information at the customer side in accordance with the specified quantity of the specified product, wherein

if the initial product order has a selected characteristic, ~~displaying~~ a promotion screen is displayed at the customer side containing information regarding at least one selected promotion, [[:]] and

if the initial product order does not have a selected characteristic, ~~completing~~ the sales transaction is completed in accordance with the initial product order and ~~not displaying any~~ no promotion information is displayed at the customer side.

37. (previously presented) The method of claim 36, wherein the characteristic includes a quantity of products included in the initial product order.

38. (previously presented) The method of claim 36, wherein the promotion screen is for a retail sales transaction when the selected characteristic is indicative of a retail order and is for a business-to-business sales transaction when the selected characteristic is indicative of a business order.

39. (previously presented) The method of claim 36, wherein the selected characteristic is at least one of a quantity of a product and a total price of the initial product order.

40. (previously presented) The method of claim 39, wherein the promotion screen is for retail transaction when at least one of quantity and total price of the initial product order is within a first range but is for a business-to-business transaction when at least one of a quantity of product and a total price of the initial product order is in a second, higher range.

Claim 41 (canceled).

42. (currently amended) A system for promoting product sales in Internet transactions, the system comprising:

a seller side computer facility configured to communicate information through the Internet with a customer side computer facility including a display and an information entry device;

wherein when the seller side facility receives, from the customer side facility, order information indicative of an initial order including a specified quantity of a product, the seller side facility compares the quantity of the initial order to a minimum quantity and changes display information to be delivered to the customer side facility in accordance with the specified quantity, and

if the quantity of the initial order meets or exceeds a minimum quantity, the seller side facility sends to the customer side facility, promotion information describing at least one promotion functionally related at least to the quantity, and

if the quantity of the initial order is less than the minimum quantity, the seller side facility processes the initial order received from the customer side facility and delivers no promotion information to the customer side facility.

43. (currently amended) A system for promoting product sales in Internet transactions, the system comprising:

a customer side computer facility configured to communicate information through the Internet with a seller side computer facility, and including a display and an

information entry device;

wherein the customer side facility sending to the seller side facility, order information indicative of an initial order including a specified quantity of a product, ~~and after the quantity of the initial order is compared to a minimum quantity~~ and display information received by the customer side facility from the seller side facility changes in accordance with the specified quantity,

if the specified quantity of the initial order meets or exceeds a minimum quantity, promotion information describing at least one promotion functionally related at least to the specified quantity is displayed at the customer side; and

if the specified quantity of the initial order is less than the minimum quantity, the initial order received from the customer side facility is processed and no promotion information is displayed at the customer side.

44. (previously presented) The method of claim 23, wherein if the customer elects to revise the order: entering information to that effect at the customer side that conforms to the selected promotion, whereby the initial order is no longer operative at the seller side; and executing the revised order at the seller side.
